

Thank you for purchasing the Aquaponic Gardening Course! Here is how to activate your course registration...

1. Go to Udemy.com and sign up for an account.
2. Find the Aquaponic Gardening course on Udemy.com - <http://www.udemy.com/aquaponic-gardening/>
3. Click on “Redeem a coupon” under the blue “Take this course” button.

4. Copy and paste “**66SArTzm**” into the Redemption Code.
 - a. **Please note that this code is only active until February 13, 2015.**
 - b. **Do not share this code! Unauthorized use of the code is stealing and will result in permanent removal from the course.**
5. Click on “Continue to course”

Congratulations! You have enrolled in
Aquaponic Gardening: Growing Fish and Vegetables
Together
By Sylvia Bernstein

CONTINUE TO COURSE

Congratulations! You are now fully registered for this course...forever!

Please see the next page for Hints for a Great Class Experience

Hints for a Great Class Experience

- a. You can now view the class on your iPhone or iPad, just go to <https://itunes.apple.com/us/app/udemy/id562413829> to download this FREE app.
- b. Please note that each lesson in this course starts with a 15 minute introductory video. You will see the same 15 seconds at the start of each video.
- c. The Live Chat sessions are scheduled for every other Thursday evening from 7:00 – 8:00 Mountain Time. I will send out a reminder earlier in the week, and then you will receive another email with a link to get into the session about ten minutes before we go live. If you would like to join us please follow that link and come prepared with a topic you would like to discuss.
- d. Udemy courses work best with the Google Chrome Browser and worse with Microsoft Explorer.
- e. The good folks at Udemy handle the technical issues related to the platform. If at any time you have problems with a lecture not loading first try refreshing the page. If that doesn't work then e-mail **support@udemy.com** with the browser you are using, your operating system, the course title & the lecture causing problem, and a screenshot of problem.

And finally, ***please take a moment to review it when you are done – I would love your feedback!***
